ACTIVE FAITH FOR FUTURE GENERATIONS

The Faith we have now will be the stepping stone for tomorrow's youth. We have a new generation of campers coming to our camp and we need to be looking at how we can improve their camping experience.

Last year we started the remodel process of our cabins at SICSC. We have completed Cabin 9 and it's now time for the next project!

Did you know our cabins are 48 years old? That is 48 year old plumbing, lights, sinks, toilets...you get the picture? It is time for cabin makeovers.

The enclosed pictures show what has been completed in Cabin 9. It cost \$30,000 for a contractor to complete that work. Plans are being made for Cabin 1 to be remodeled this off-season. Even though it will be handicap accessible, which costs more, we already know we can save money compared to Cabin 9. But this will take volunteers like: youth groups, SS Classes, or people with certain skills to assist. We will need to hire a contractor to do some of the work. He will also be willing to work with volunteers to help us save money.

We have included a **list of needed items** to get this project completed. We would love for you to donate to a particular item listed below, or even take on a whole item yourself! Please understand if you donate toward a cabin item and the item has already been chosen, your donation will go to the next item needed on the list.

A **Camp Open House** is being planned for Saturday, October 27, 2018. There will also be a Work Day beginning at 8 am, with a potluck for everyone at 6 pm. Bring sides, casseroles and desserts-provided will be meat, roll, salad and drinks. You will have the opportunity to tour Cabin 9 on this day.

We truly want to modernize our camp facilities, but that is going to take money to do so. Pray for our vision to modernize our cabins and enhance our camper experience.
